### DETAILED ACTION

1. Claims 9, 14-17, 20-23, and 25-30 are not being examined because they are related to non-elected species.

#### *Allowable Subject Matter*

1. Claims 2-8, 10-13, 18-19, and 24 are allowed.

#### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is being rejected under 35 U.S.C. 103(a) as being unpatentable over Takamori Kazuo (JP 2000-100955).

As to claim 1, Takamori shows, referring to figures 1 and 3, I/O cells 2 formed in cell forming layer together with macro-cells. There are power supply pads (located in the inner

region 3) formed in the pad-forming layer and electrically connected to the I/O cells. Signal pads 5 are formed in the pad forming area, electrically connected to the I/O cells and arranged in an area outside of an area of the power supply pads (located in the inner region 3). Figure 3, shows that the I/O cells are in an area outside of the power supply pads.
